

## Cell Diagramming Notes

### Diagramming Rules:

1. Draw only one cell – ON HIGH POWER
2. Label the organelles/structures that you can identify.
  - a. draw straight lines
  - b. do not crisscross
  - c. do not underline
  - d. do not write on an angle
3. Print all labels/titles
4. Place title UNDER your diagram
  - a. Identify what you are viewing
  - b. Identify the power you using.
5. For most diagrams, you will have 2 for each cell type.
  - a. One drawn under low power – 40X
  - b. One drawn under high power – 400 X
